

Technical Support for Highway Operator in China

Honshu-Shikoku Bridge Expressway Company Limited (HSBE) made a contract “Technical Consulting on Coating Inspection and Coating Deterioration Prediction for Steel Structure” from Zhejiang Expressway Company Limited managing expressways in China on September 19th, 2025.

[Outline of Services]

Title : Technical Consulting on Coating Inspection and Coating Deterioration Prediction for Steel Structure

Order : Zhejiang Expressway Company Limited (China)

Duration : Between September 19th, 2025 and January 15th, 2026

Scope : HSBE will conduct the following works as technical support

- ① Provide the guidelines for HSBE's coating management
- ② Assist in preparing their own guidelines
- ③ Deliver the coating inspection equipments
- ④ Conduct on-site coating inspection training

【Background】

HSBE provides technical supports for long-span bridges in Japan and overseas by utilizing the technologies accumulated from the construction to the maintenance of Honshu-Shikoku Bridge Projects.

In July 2024, HSBE conducted a technical exchange with Zhejiang Expressway Company Limited in China. After that, Zhejiang Expressway Company Limited had an interest in HSBE's maintenance technologies and requested technical supports from our company. In October and December 2024, HSBE visited Zhejiang Expressway Company Limited to confirm their needs and conduct on-site surveys. Both parties confirmed the technical support scope regarding coating inspection and coating degradation prediction and signed the contract.
